MADE IN HOME A HARISHMANE LEGACY

AN ISO 9001:2015 CERTIFIED COMPANY

No. 77, Hope Church road, K. Channasandra, Post
Horamavu, Bengaluru, Karnataka 560043

ABOUT US

Made in Home: Formerly Harishmane Infratech Pvt. Ltd. takes pride in a rich legacy spanning over a decade, marked by a steadfast commitment to industry-leading excellence in every interaction with our valued clients. Our journey traces its roots back to 2011, where a visionary dream transformed into a profound epiphany, opening the door to the exploration and mastery of our innate skills and capabilities.

As a testament to our dedication, we have consistently embraced the ever-evolving landscape of the industry, adapting and growing to meet the challenges and opportunities that come our way. Harishmane Infratech stands as a beacon of reliability, integrity, and professionalism, offering a comprehensive suite of services that reflects our deep understanding of the construction and infrastructure domain.

Our team, comprising skilled professionals and experts, is the driving force behind our success. Their collective expertise and unwavering commitment enable us to consistently exceed client expectations and set new benchmarks in the industry. We take pride in our collaborative approach, working closely with clients to understand their unique needs and delivering tailored solutions that stand the test of time.

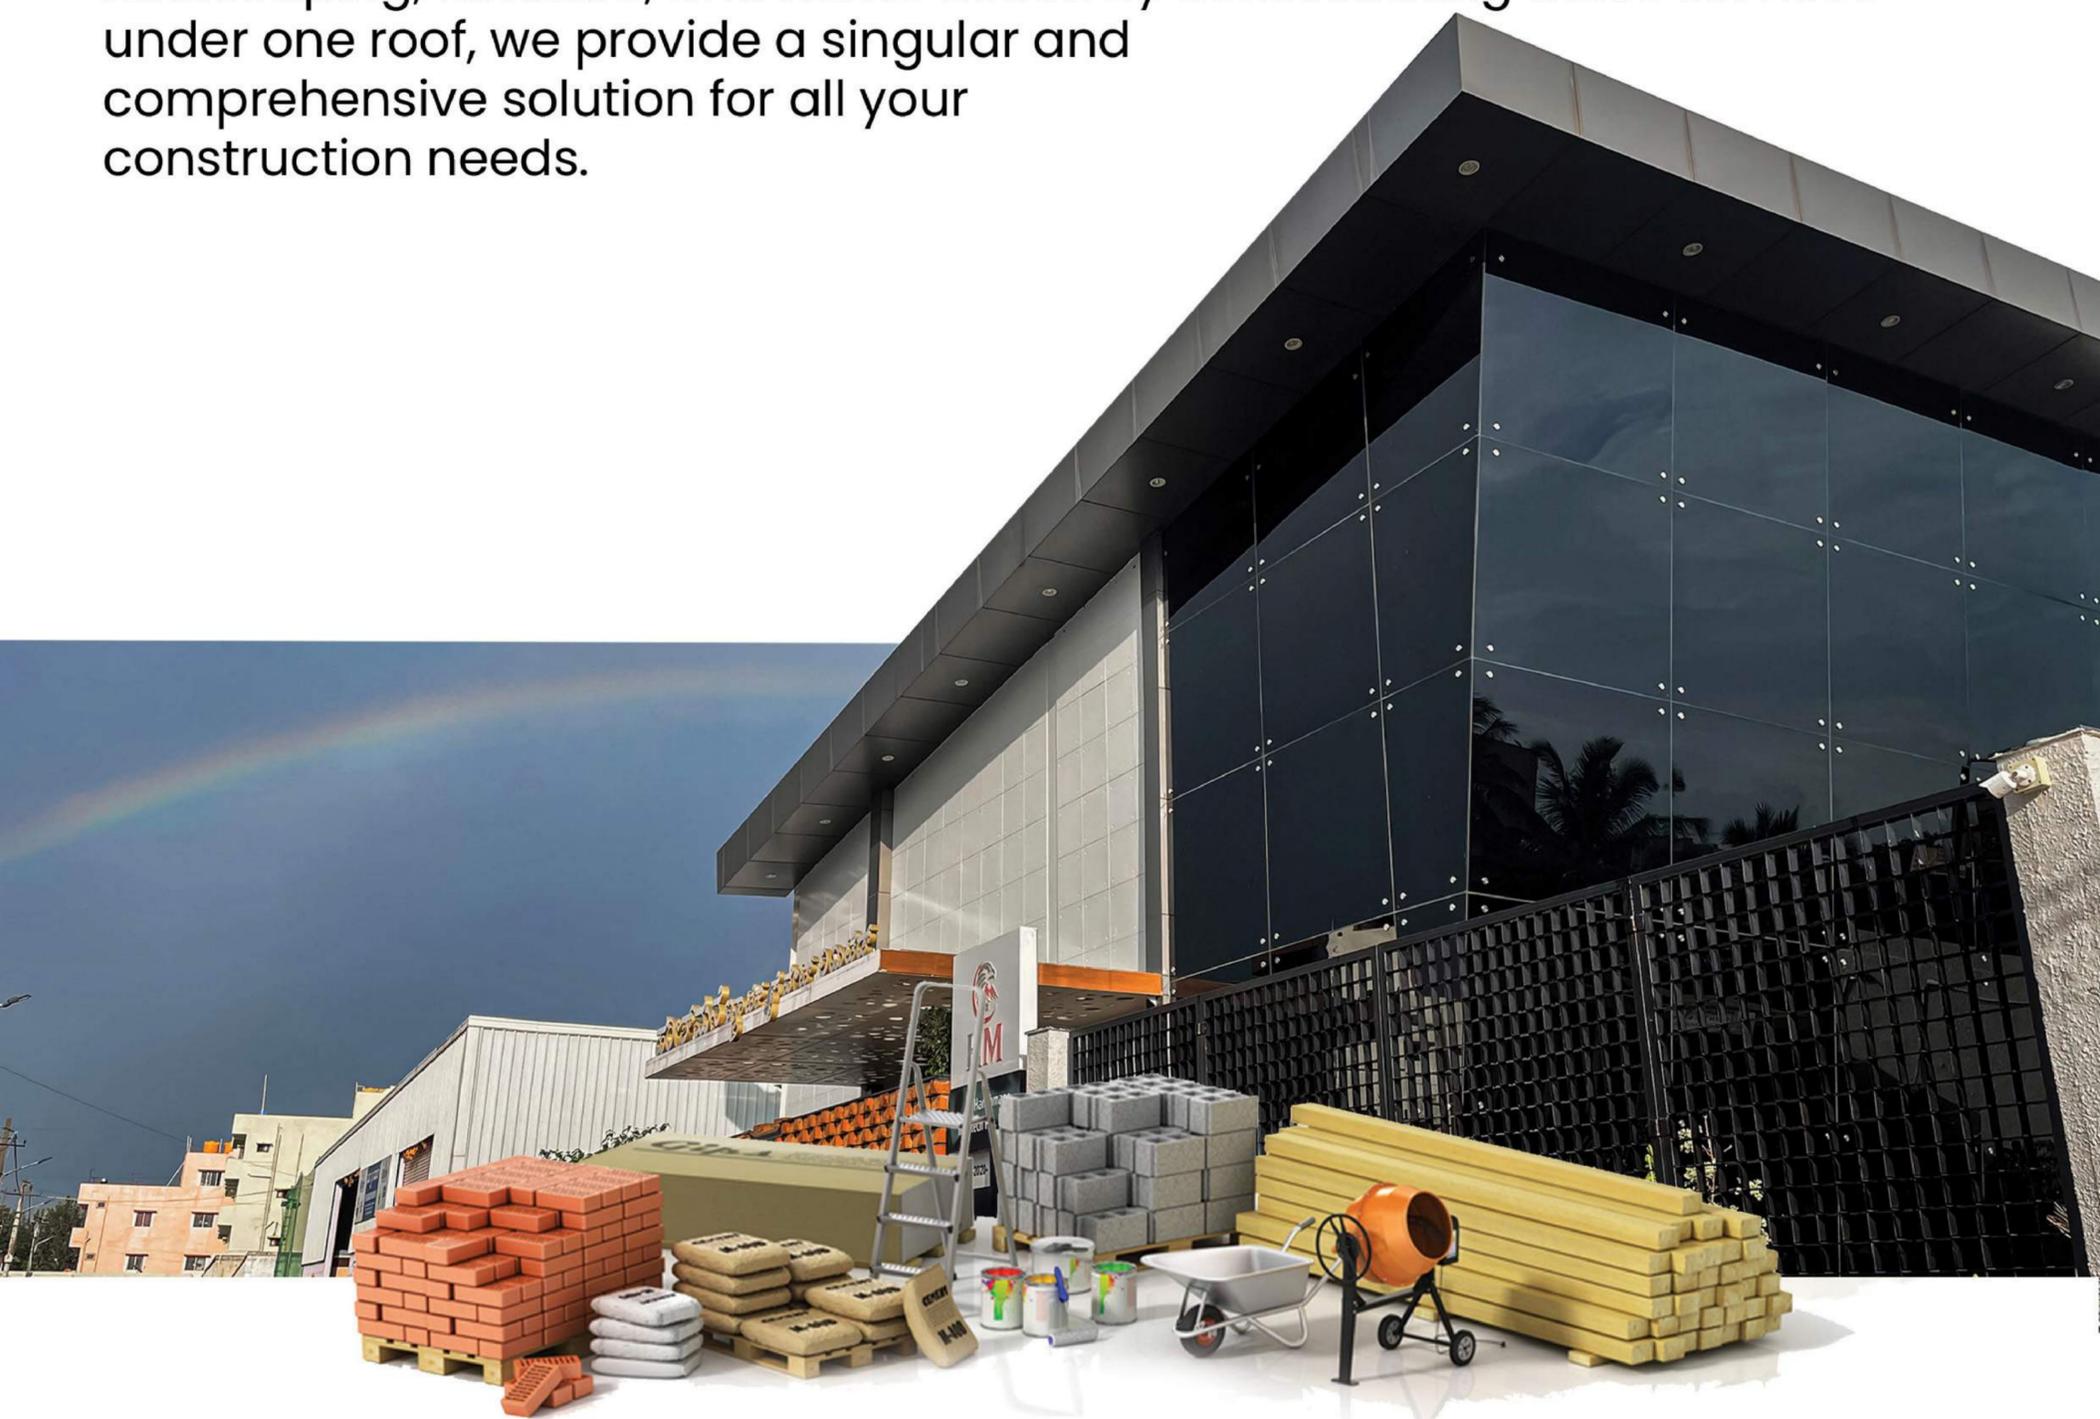

WHY MADE IN HOME

At our core, we are committed to maintaining absolute transparency and unwavering honesty throughout the entire journey of your construction project. From the initial concept to the final finishing touches, we prioritize openness and integrity to ensure you have complete confidence in our process.

As part of our commitment to clarity, we provide detailed **Bill of Quantities (BOQ)** for every facet of the project. This meticulous breakdown not only serves as a comprehensive roadmap for the undertaking but also empowers you with a clear understanding of the scope and associated costs.

To keep you well-informed and engaged, we provide regular and timely updates directly from the construction sites. Our communication strategy is designed to offer you real-time insights into the progress of the project, allowing you to make informed decisions with confidence.

What sets us apart is our holistic and integrated approach. We seamlessly bring together diverse expertise in architecture, construction, interiors, landscaping, furniture, and home decor. By consolidating these services under one roof, we provide a singular and comprehensive solution for all your construction needs.

OUR SERVICES

Whether you're dreaming of your first home, a tranquil vacation retreat, or a luxurious estate to celebrate your achievements, the possibilities for house designs are truly limitless. Made in Home: Formerly Harishmane Infratech Pvt. Ltd., we bring everything under one roof, offering a bespoke design language that is uniquely tailored to your needs.

We excel in Architectural Designing & Planning for both residential and commercial spaces, ensuring that every detail aligns perfectly with your vision. Our services encompass the complete spectrum—from the construction and interior design of apartments to the meticulous execution of your plans. We also specialize in Renovation, providing innovative design and structural enhancements to breathe new life into existing spaces. For commercial projects, we deliver tailored solutions for local businesses and corporate entities, creating environments that inspire success.

MADE IN HOME A HARISHMANE LEGACY

YOUR ONE-STOP SOLUTION FOR ALL YOUR ABODE NEEDS.

**ARCHITECTURAL | CONSTRUCTION | INTERIOR & RENOVATION
COMMERCIAL AND RESIDENTIAL PROJECTS**

YOU'RE JUST THREE STEPS AWAY FROM CREATING YOUR DREAM ABODE

Step 1

1. **Site Visit:** We will let our work speak for itself, have a look at our Completed homes for our workmanship and the design reference.
2. **Planning:** Share your requirement with us and we will guide you with our expertise.
3. **Advance:** Like what we have to offer? Pay the advance and place the order.

Step 2

1. **Plan Options:** How to choose the best without options? Get up to 2 conceptual plans for your residence.
2. **Revisions:** Floor Plans can be subjected up to 2 revisions.
3. **Estimation:** Get a detailed estimation down to the every material list for the selected floor plan.

Step 3

1. **Agreement Signing:** A detailed agreement explaining each process with technical details.
2. **Commencement of work:** A Specialized dedicated engineer allotted to your site.
3. **Updates:** Get a regular updates with work progress details and upcoming work schedule (with drawings and site images).
4. **Payments:** Payments will be taken prior to commencement of each stage of work.

CONTENTS

- 1 . Floor Plan
- 2 . Center line
- 3 . Plinth Beam & UG Sump
- 4 . 3D Elevation
- 5 . 2D Elevation Working Drawing
- 6 . Working Drawing
- 7 . Structural Drawing
- 8 . Sunshade / Chajja
- 9 . Roof Electrical Layout
- 10 . Wall Electrical Layout

- 12 . Plumbing Drawing
- 13 . Fabrication Presentation
- 14 . Fabrication Drawing
- 15 . Flooring Layout
- 16 . Doors Presentation
- 17 . UPVC drawing
- 18 . Interior Presentation
- 19 . 3D Interior Views
- 20 . False Ceiling Drawing
- 21 . Exterior / Interior Paint Color Code
- 22 . Designer Light Selection
- 23 . Architectural Package
- 24 . FAQ

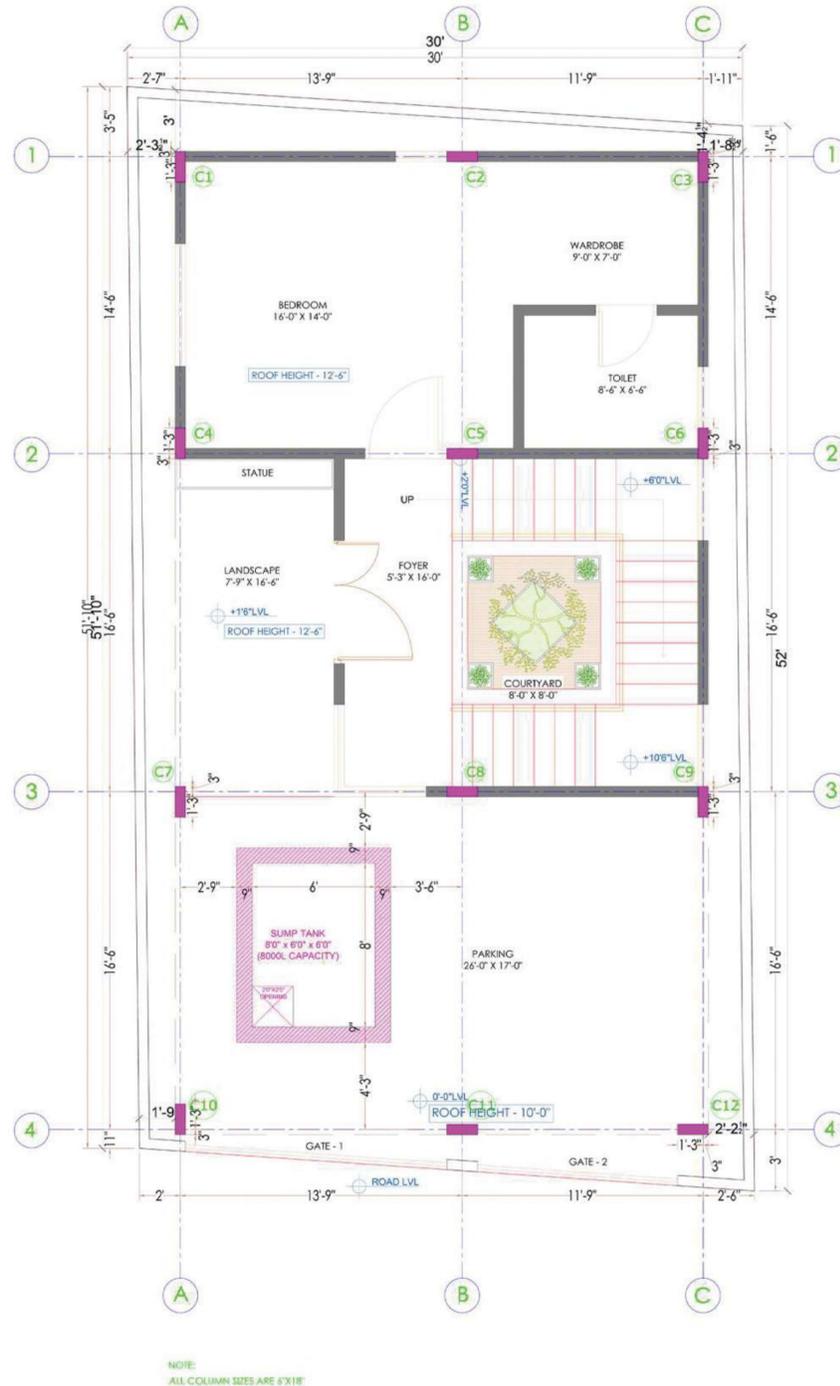

FLOOR PLAN

- Comprehensive 2D floor plans encompassing all levels, featuring up to three distinctive conceptual designs tailored to the provided requirements*.
- Each floor plan meticulously includes room dimensions, pillar positions, furniture placements, and door/window positions.
- Fundamental Vastu principles are inherently integrated, with additional Vastu considerations open for discussion prior to commencing the floor plan.
- The selected option allows for up to two revisions; thereafter, any further revisions or a new plan will incur additional charges of INR 10,000.
- The drafting process is anticipated to span 07 working days (all 3 options) for initial completion. Subsequent modifications and revisions will then require an additional 2-3 working days to ensure thorough and precise adjustments.

CENTER LINE

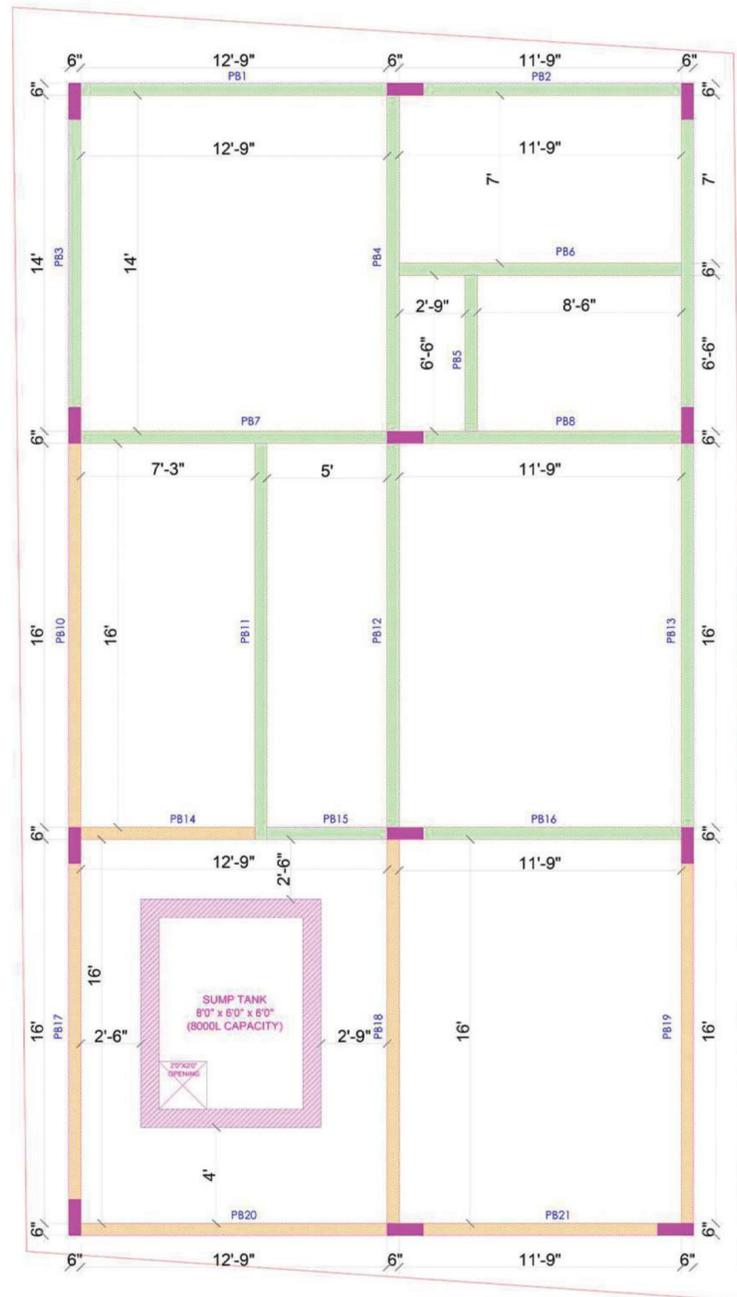

- The centerline drawing, depicting column alignment and orientation markings, is finalized upon approval of the plan.
- The drafting process is anticipated to span 2-3 working days once the floor plan is finalized
- No variations or revisions are available for the centerline drawing, as it aligns with the approved floor plan.

Note: Any alterations to the centerline drawing will incur an additional cost of ₹3,000 per revision.

PLINTH BEAM & UG SUMP

- The plinth beam drawing comprehensively outlines details such as beam dimensions, specifications of reinforcement bars including type and spacing, stirrup placements, and other pertinent specifications.
- Underground sump positions, dimensions, and capacity will be explicitly incorporated into the drawing.
- The drafting process is anticipated to span 2-3 working days once the floor plan is finalized
- No options or revisions are available for the plinth drawing, as it aligns with the approved floor plan.

Note: Any alterations to the plinth beam drawing will incur an additional cost of ₹3,000 per revision."

3D ELEVATION

3D ELEVATION

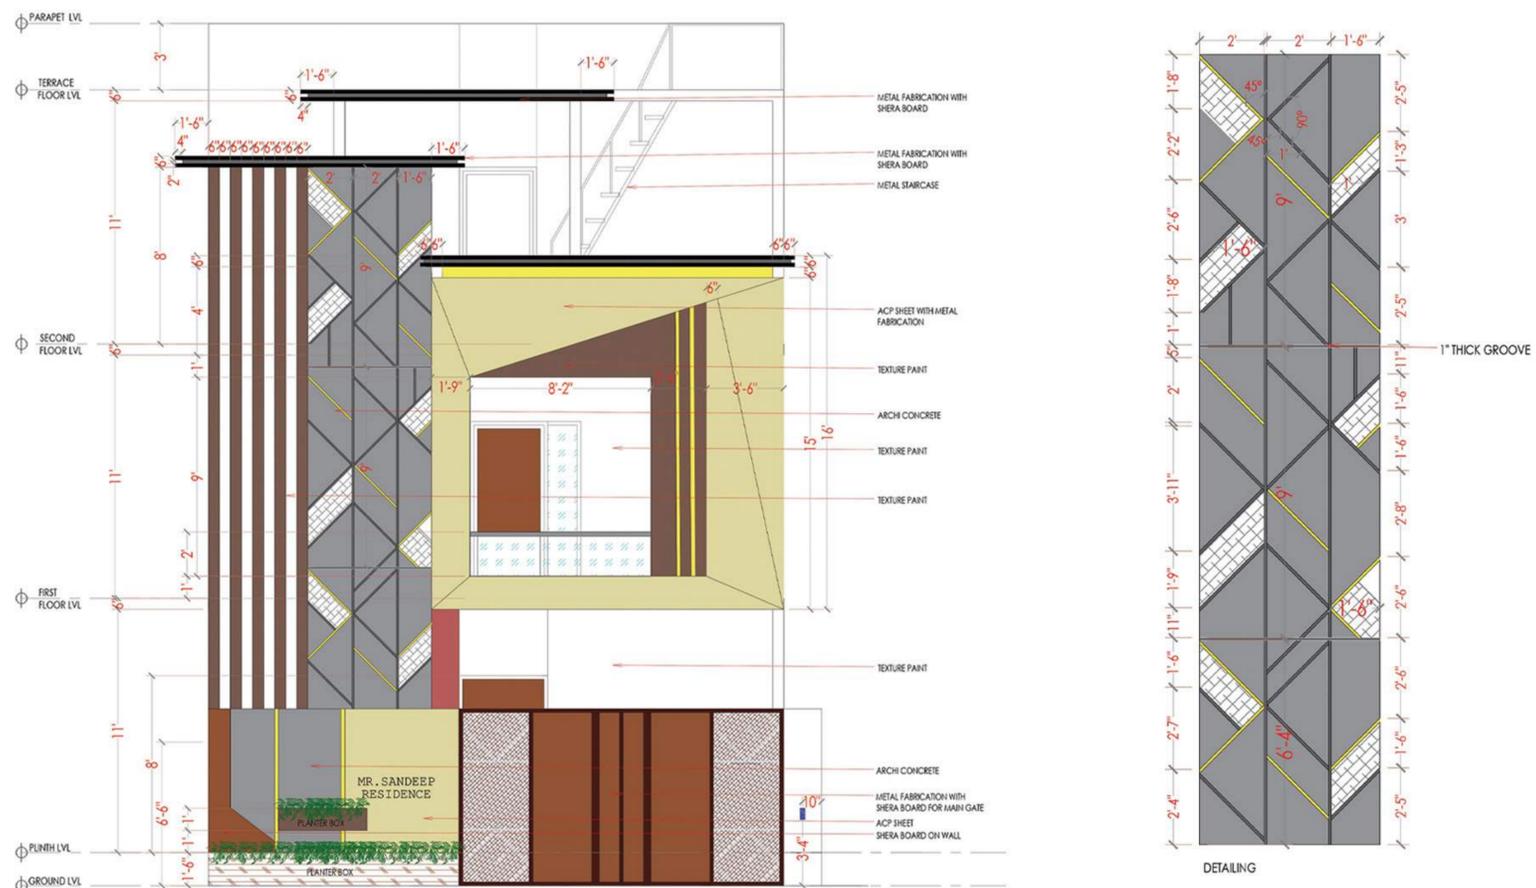

Three distinctive conceptual elevation designs will be presented as 3D renders, aligned with the chosen floor plan.

- The selected elevation design allows for up to two revisions, encompassing alterations to materials, color schemes, and other specifications.
- Any supplementary elevation options or extra revisions beyond the initial two can be accommodated at an additional charge of Rs. 100/ per sqft.
- The drafting process is anticipated to span 15 working days(all 3 options) for initial completion Subsequent modifications and revisions will then require an additional 7 working days to ensure thorough and precise adjustments.

2D ELEVATION WORKING DRAWING

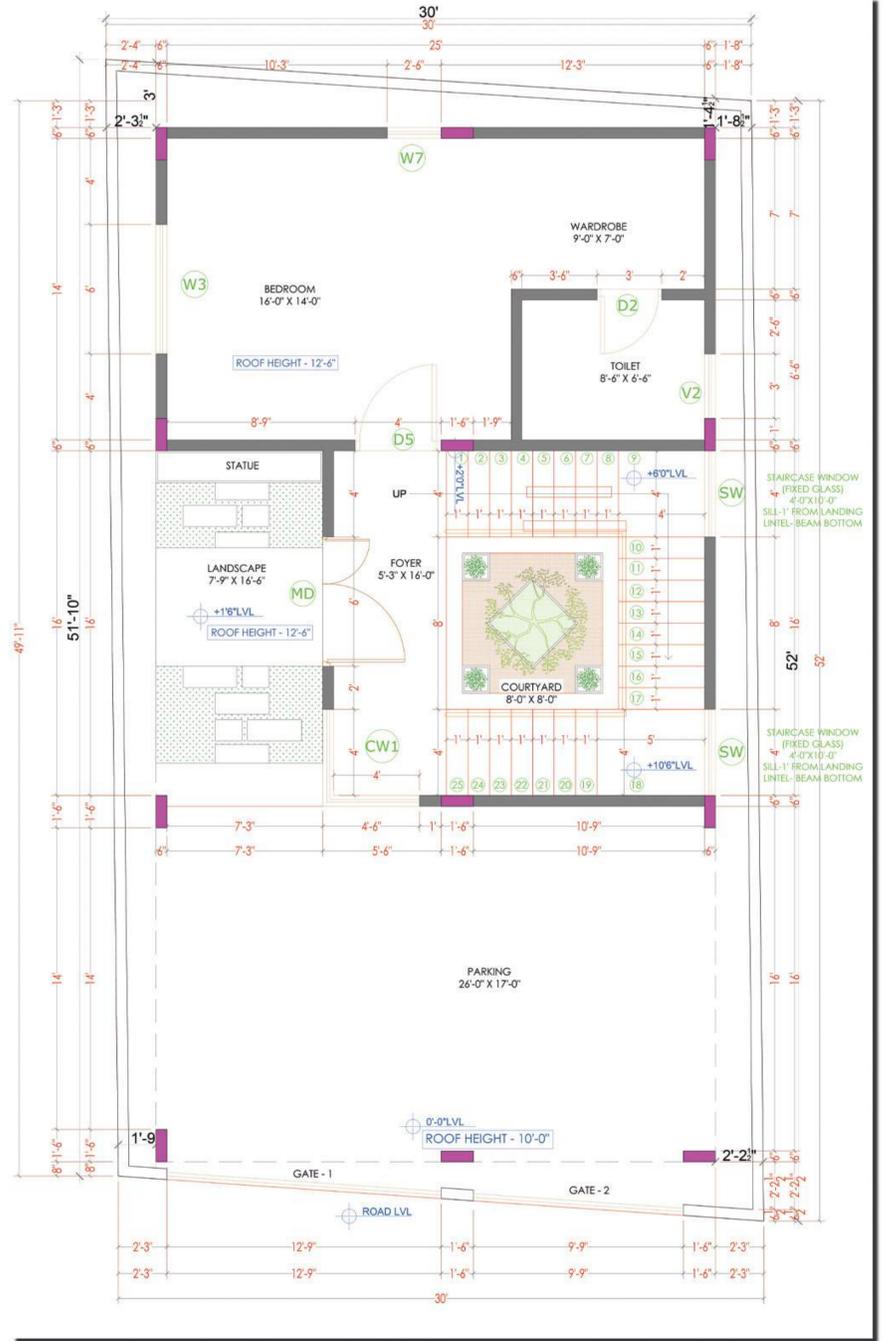

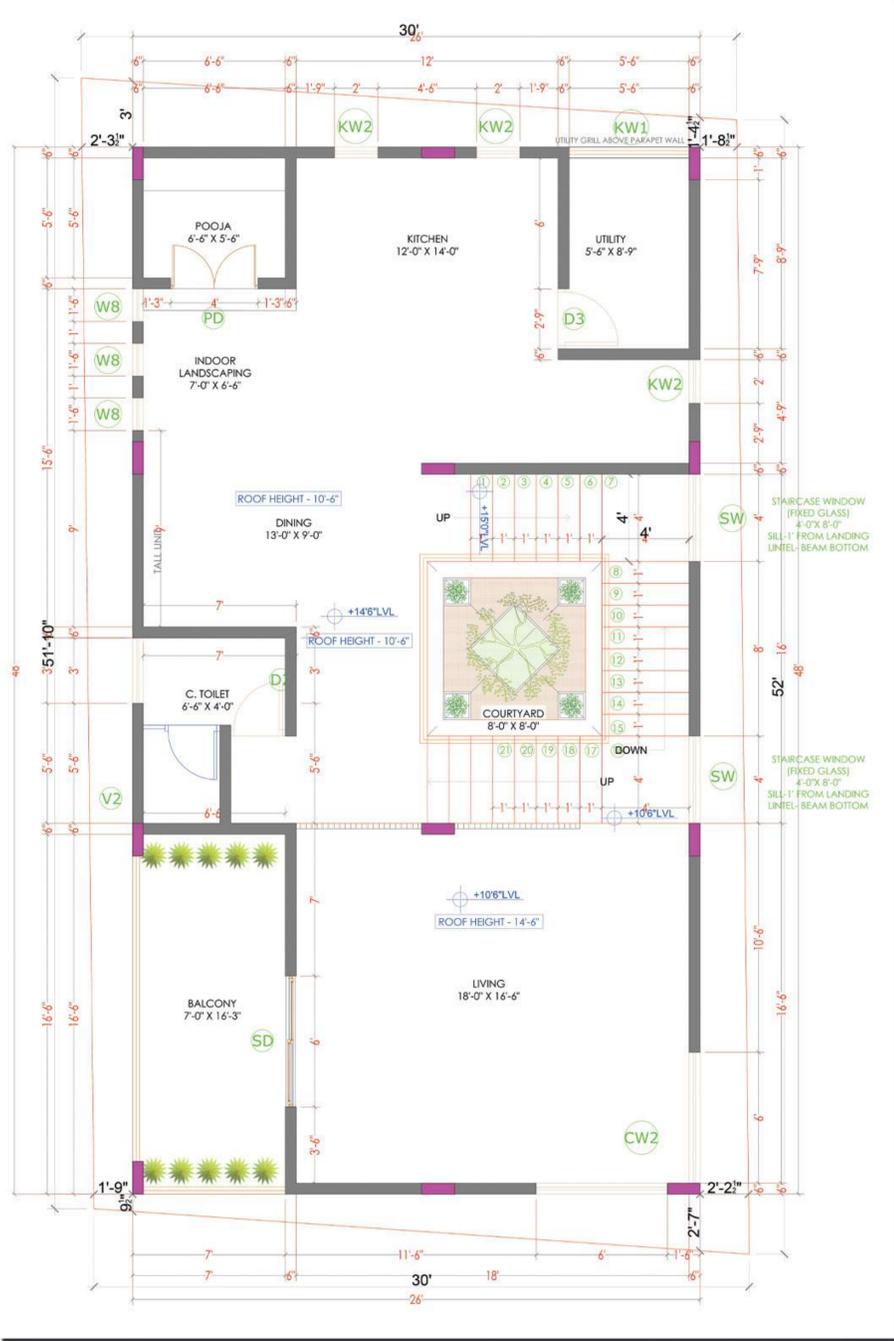

The working drawing for the elevation encompasses crucial details including material indications, vertical dimensions, fenestration specifics, floor levels, roof design, and more.

- Options are not available for the working drawing of the elevation, as its preparation follows the approval of the 3D elevation
- The drafting process is anticipated to span 7 working days once the 3D Design is finalized

Note: Any alterations to the working drawing will incur an additional cost of ₹3,000 per revision.

WORKING DRAWING

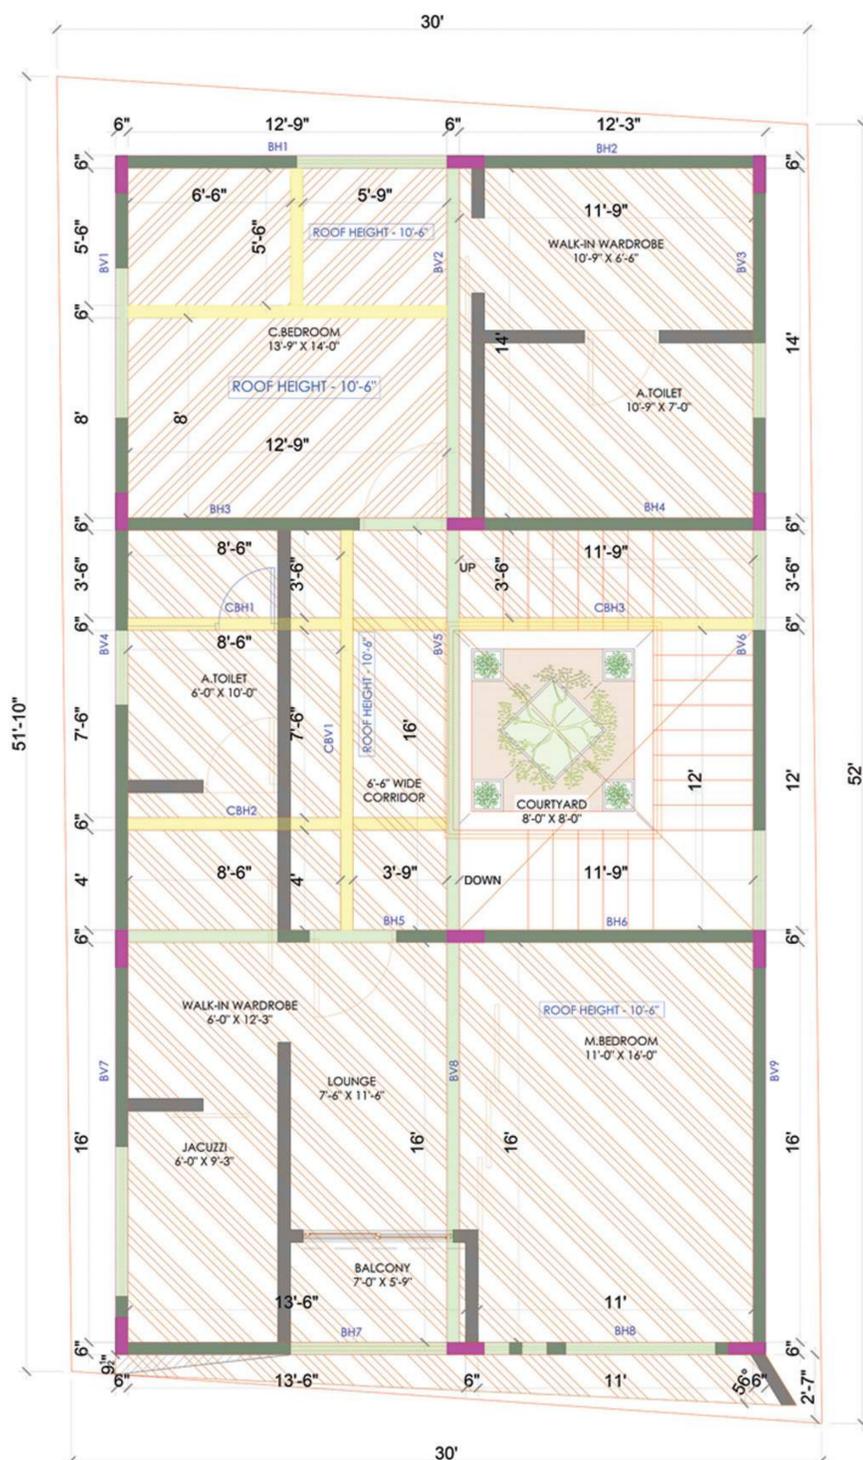

The working drawing for the floor plan encapsulates comprehensive technical details such as the schedule of openings, sizes of doors and windows, and lintel levels.

- Working drawings will be provided for all floors of the project.
- Options are not available for the working drawing, as its preparation follows the approval of the floor plan.
- The drafting process is anticipated to span 7 working days (all floors) once the floor plan is finalized. Further changes will take another 2 working days.

Note: Any post-drawing release changes can be accommodated at an additional cost of ₹3,000 per revision

STRUCTURAL DRAWING

In order to check the stability of the columns, I have modeled the entire structure.

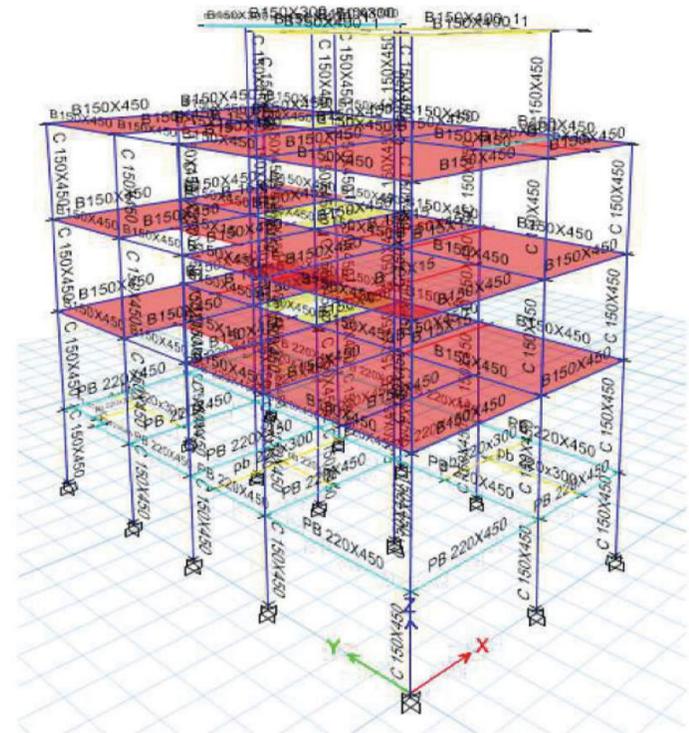

Grade of concrete = M25

Grade of Steel = FE 500

Column Size - 6" x 16"

Reinforcement provided - 4#16mm Bar + 4#12mm Bar

Beam Sizes as shown below (in mm)

Plinth Beam Size : 6"x18"

Main Beams connecting Columns 6"x18"

Other Beams: 6"x6" Concealed beams.

Slab Thickness : 6"

Foundation Depth: 5'

Floor Clear Height: 10'

The Structural Analysis report will encompass detailed information on slab shuttering for all floors, roof beam sizes and positions, and a comprehensive model and analysis of the designed structure using ETabs.

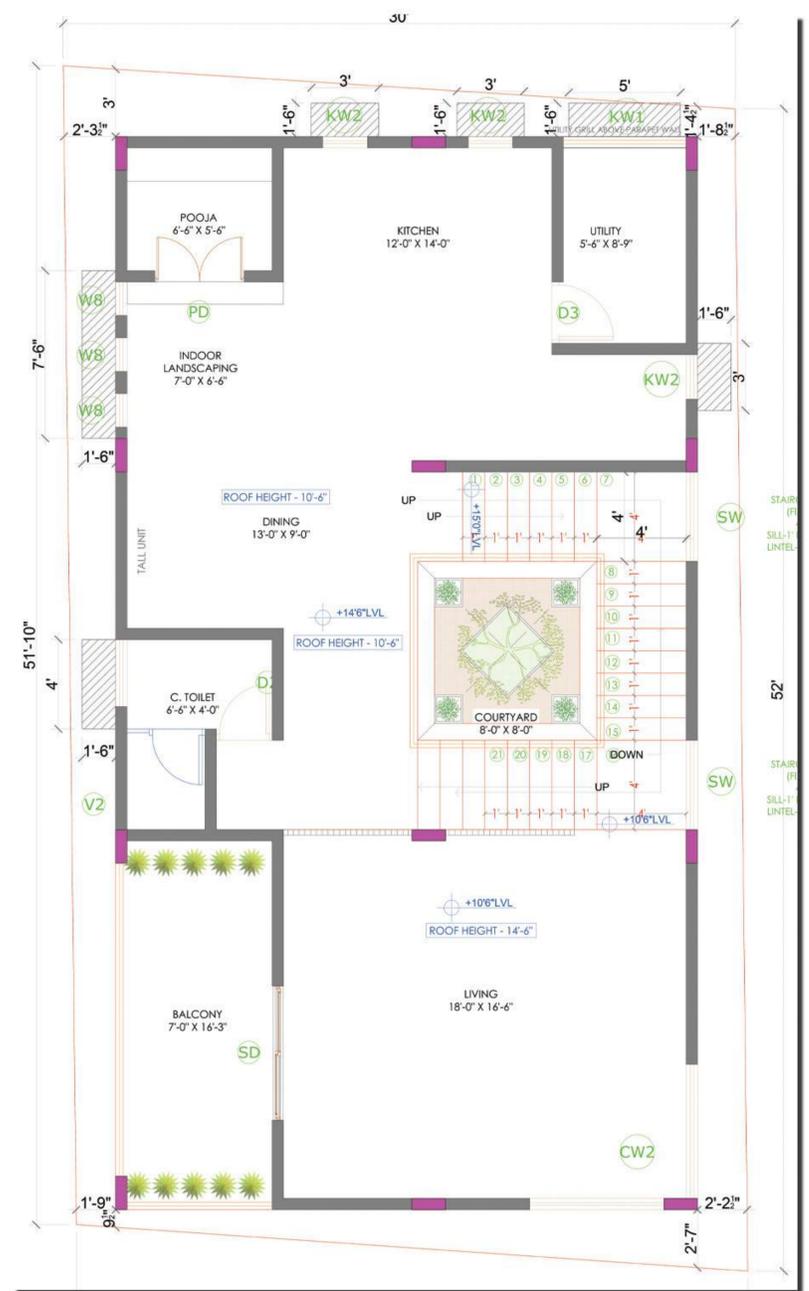

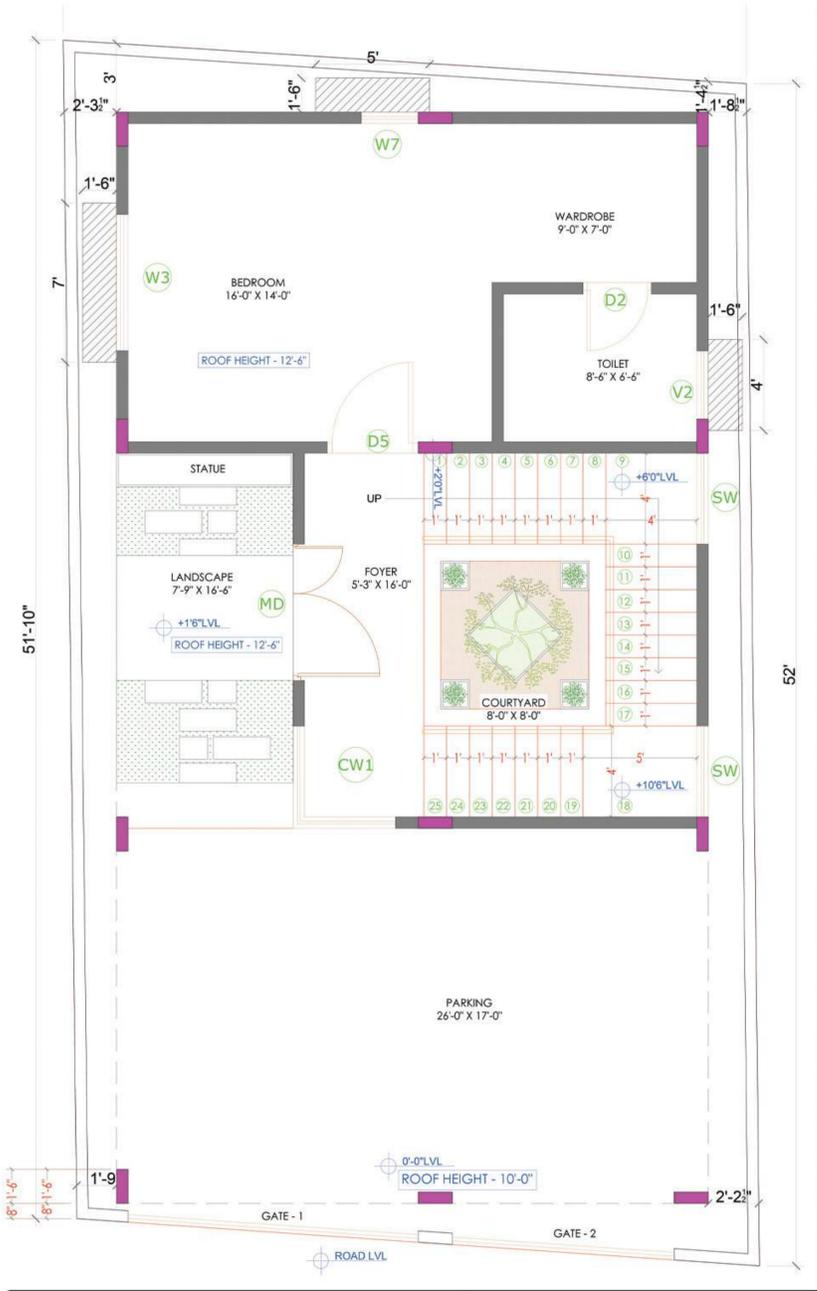

- Structural drawings will be prepared only after obtaining approval for the floor plan, and no options will be provided for these drawings.

-The drafting process is anticipated to span 5 working days to complete the drawing.

Note: Any changes made to the working drawing will necessitate a corresponding revision in the structural analysis, incurring an additional cost of ₹3,000 per revision

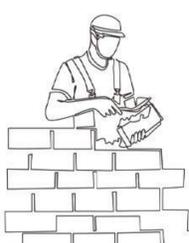

SUNSHADE / CHAJJA

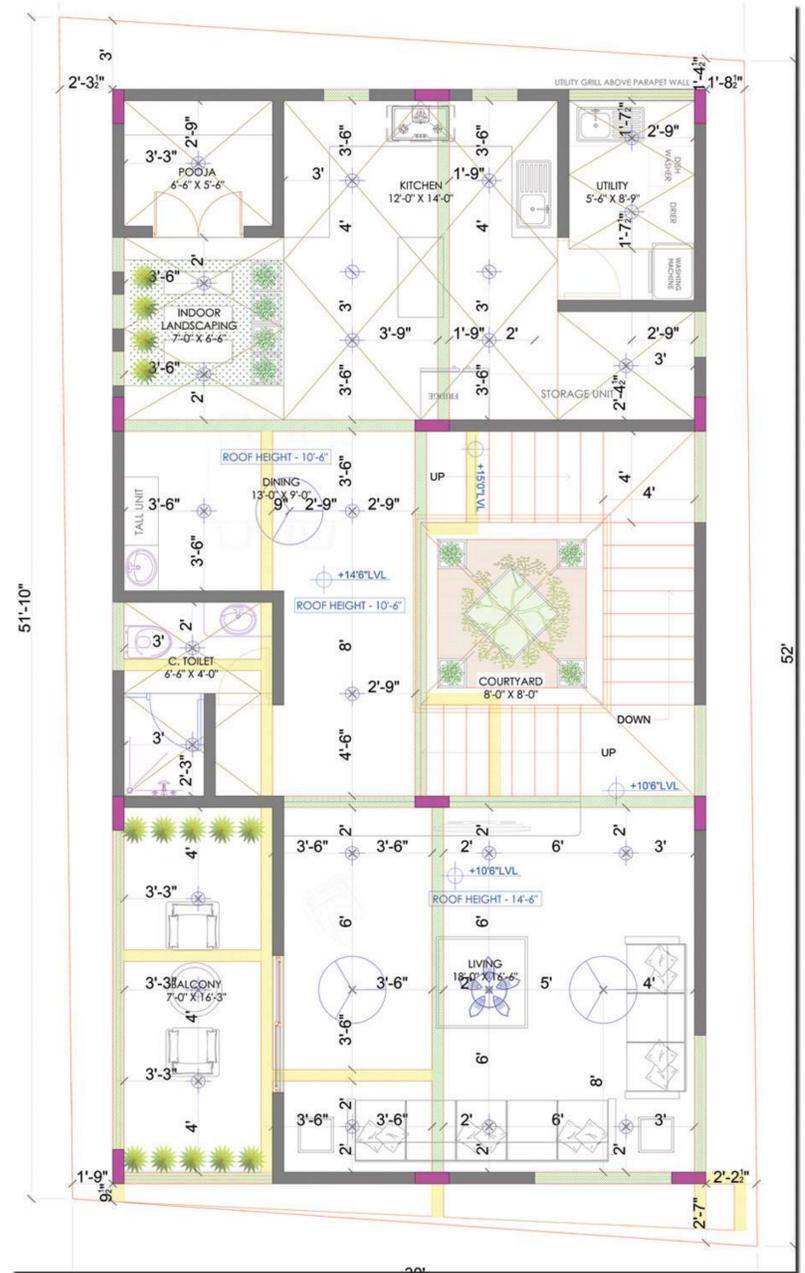

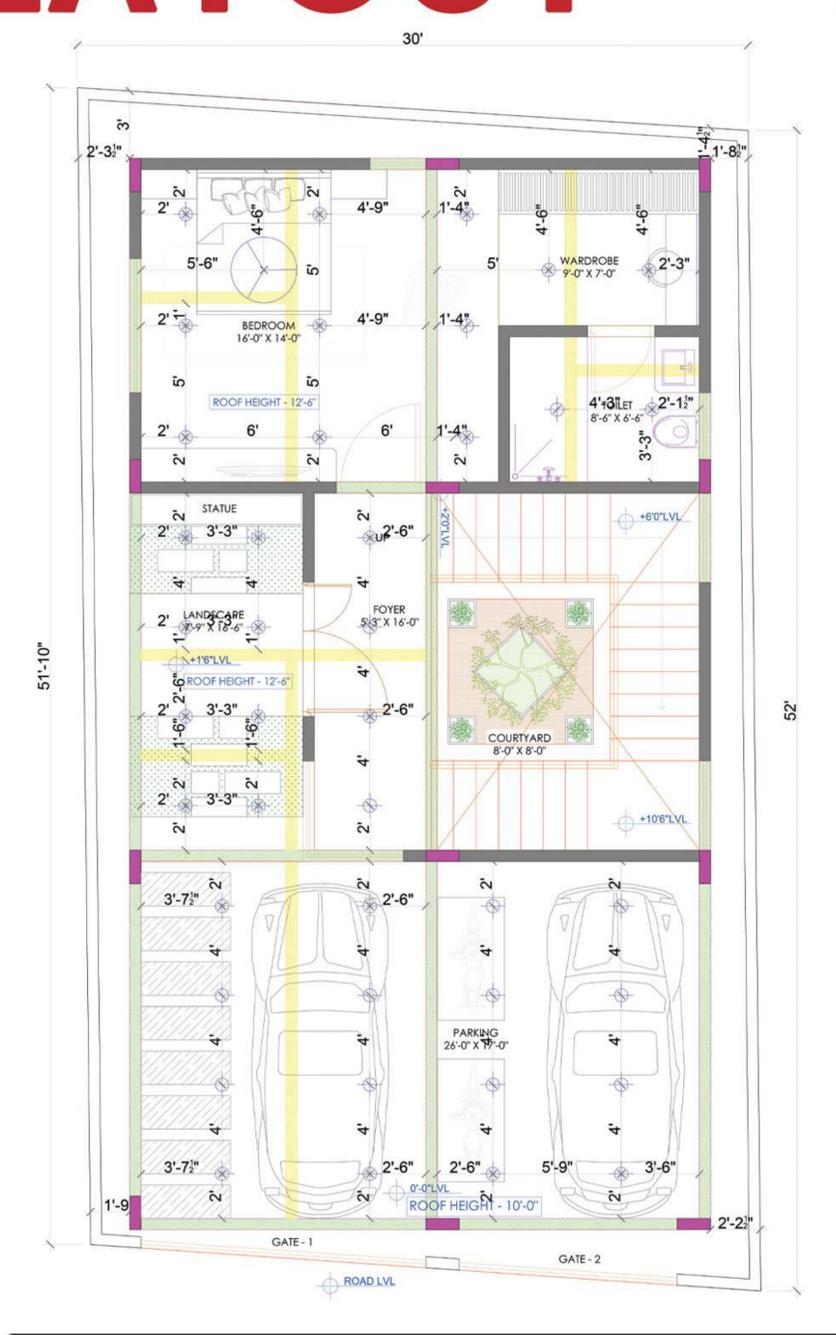

The chajja drawing, an integral part of architectural drawings, provides detailed information on the design, dimensions, and specifications of the sunshade.

- The drawing encompasses key elements such as the width, projection, and height of the chajja. In cases of sloped chajjas, the angle of the slope is specified to ensure effective rainwater drainage.
- No options are available for the sunshade/chajja drawing, as its preparation follows the approval of the floor plan.
- The drafting process is anticipated to span 2 working days once the floor plan is finalized.

Note: Any alterations to the Sunshade/Chajja drawing will incur an additional cost of ₹3,000 per revision.

ROOF ELECTRICAL LAYOUT

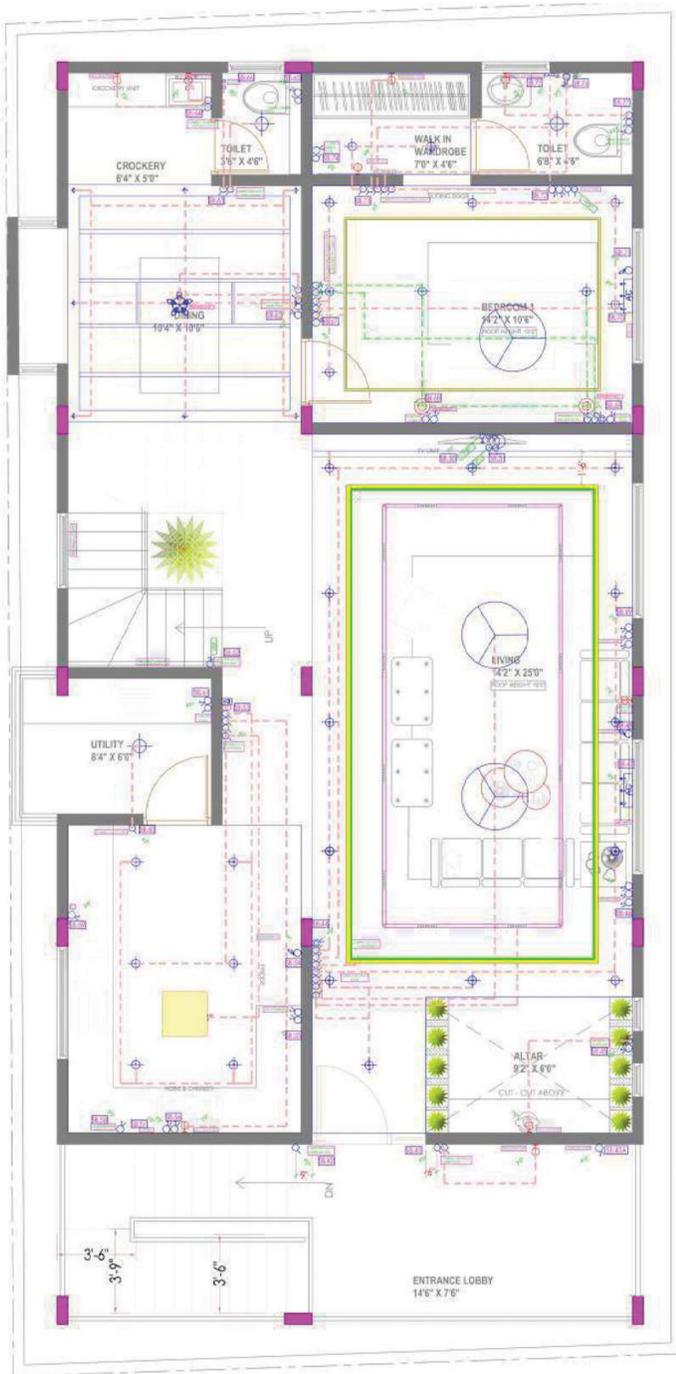

A roof electrical drawing is a specialized construction document that specifically details the electrical components and systems associated with the roof of a building. This drawing provides in-depth information about the electrical layout, wiring, and equipment situated on or within the roof structure.

- The drawing includes precise positions for lights and fans on each slab.
- No options are provided for the roof electrical layout, as its preparation follows the approval of the floor plan.
- The drafting process is anticipated to span 7 working days (all floors) once the floor plan is finalized. Further changes will take another 3-4 more days.

Note: Any modifications to the roof electrical drawing will result in an additional cost of ₹3,000 per revision.

The looping drawing provides a comprehensive breakdown of the electrical provision looping details and focuses on the electrical components and systems associated with the walls of a building. This drawing provides detailed information about the electrical layout, wiring, and equipment located within.

- The looping drawing is a finalized document and cannot be revised, as it is crafted based on the approved floor plan and wall electrical layout.
- The drafting process is anticipated to span 7 working days once the floor plan is finalized

Note: Any alterations to the looping drawing will result in an additional cost of ₹3,000 per revision

PLUMBING DRAWING

The plumbing layout drawing will include:

Precise measurements for the placement of sanitaryware to facilitate groove cutting.

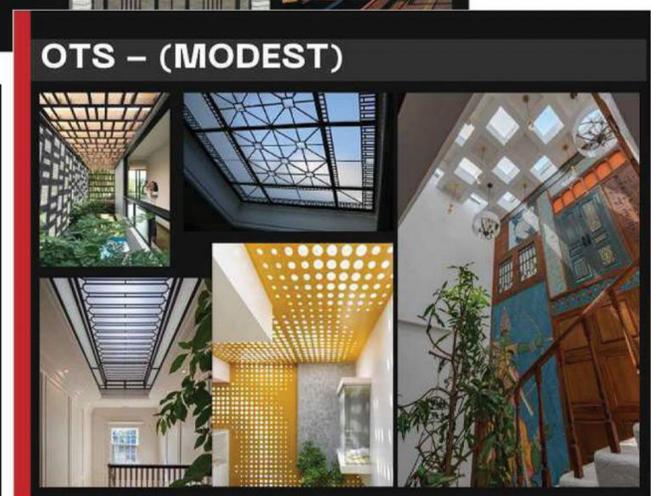

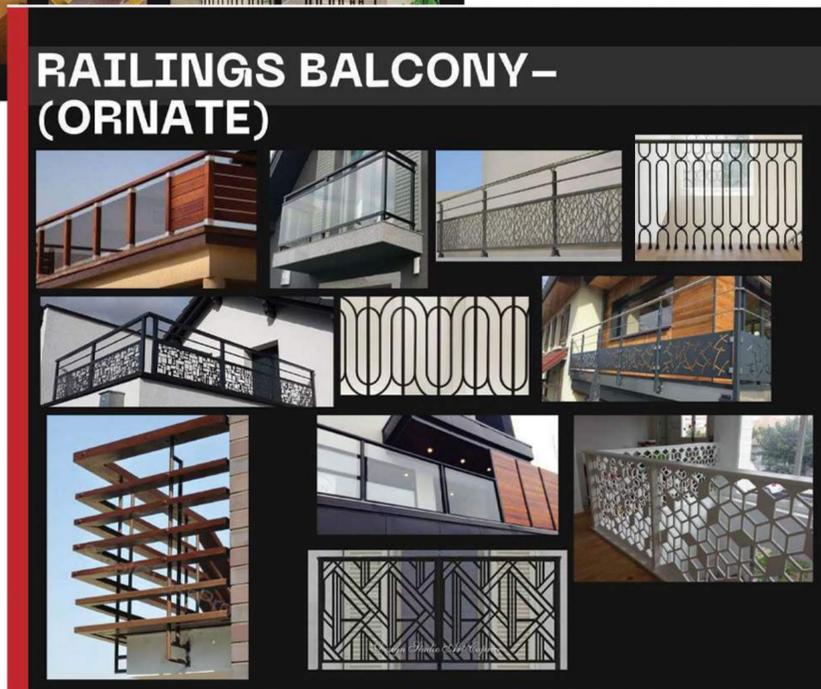

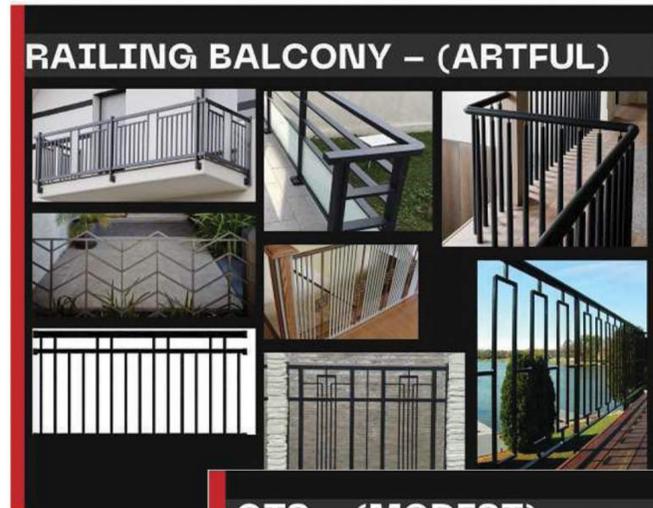

- Comprehensive details of the internal and external pipeline layout, specifying the locations of cold, hot, gray, and waste water outlets.
- The plumbing drawing is a finalized document and is not subject to revisions, as it is meticulously crafted based on the approved floor plan.
- The drafting process is anticipated to span 3-4 working days once the floor plan is finalized

Note: Any adjustments to the plumbing drawing will incur an additional cost of ₹3,000 per revision

FABRICATION

PRESENTATION

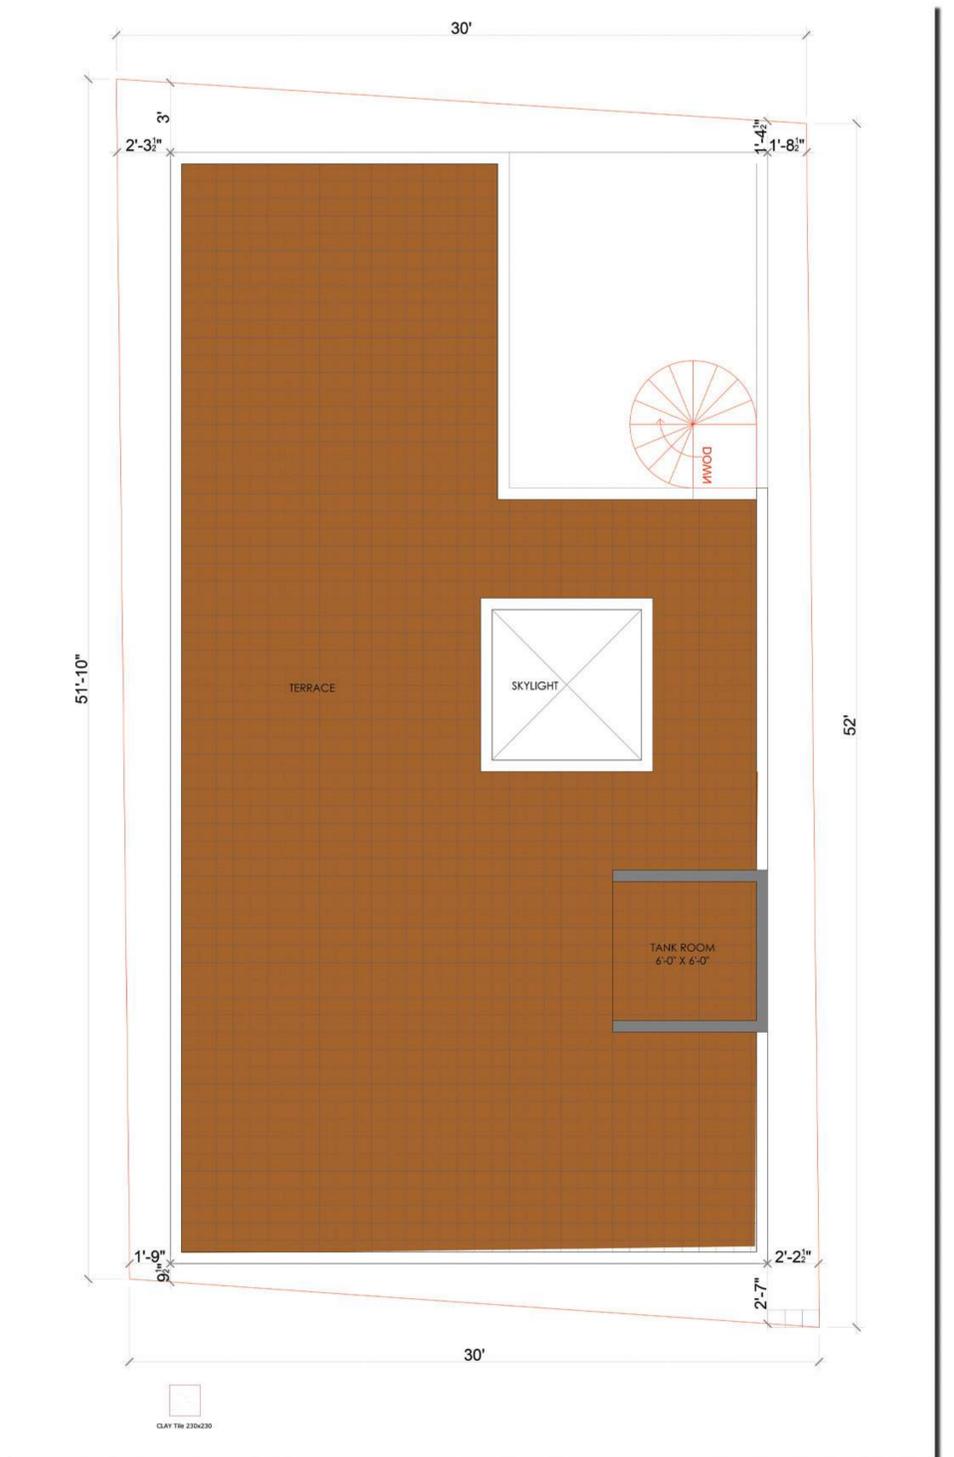

The fabrication presentation encompasses design options for all elements such as window grills, staircase railing, OTS, grills, balcony railing, partitions, etc., tailored to each floor as per the floor plan.

- Detailed drawings for the selected designs will commence upon finalizing the chosen options.
- The design presentation allows for one revision.
- The drafting process is anticipated to span 7 working days for initial completion. Subsequent modifications and revisions will then require an additional 3-4 working days to ensure thorough and precise adjustments.

Note: Any modifications to the fabrication presentation will incur an additional cost of ₹5,000 per revision. Clients are encouraged to share their ideas and references before finalizing the presentation.

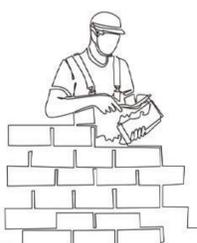

FLOORING LAYOUT

Comprehensive 2D flooring drawings for all floors, including toilet floor and wall flooring, will be provided for review before material selection.

- Upon choosing the flooring material, the drawing can be revised once.
- After finalizing the material and releasing the ultimate drawing, no further changes can be accommodated.
- The drafting process is anticipated to span 5 working days for initial completion. Subsequent modifications and revisions will then require an additional 3-4 working days to ensure thorough and precise adjustments.

DOORS

PRESENTATION

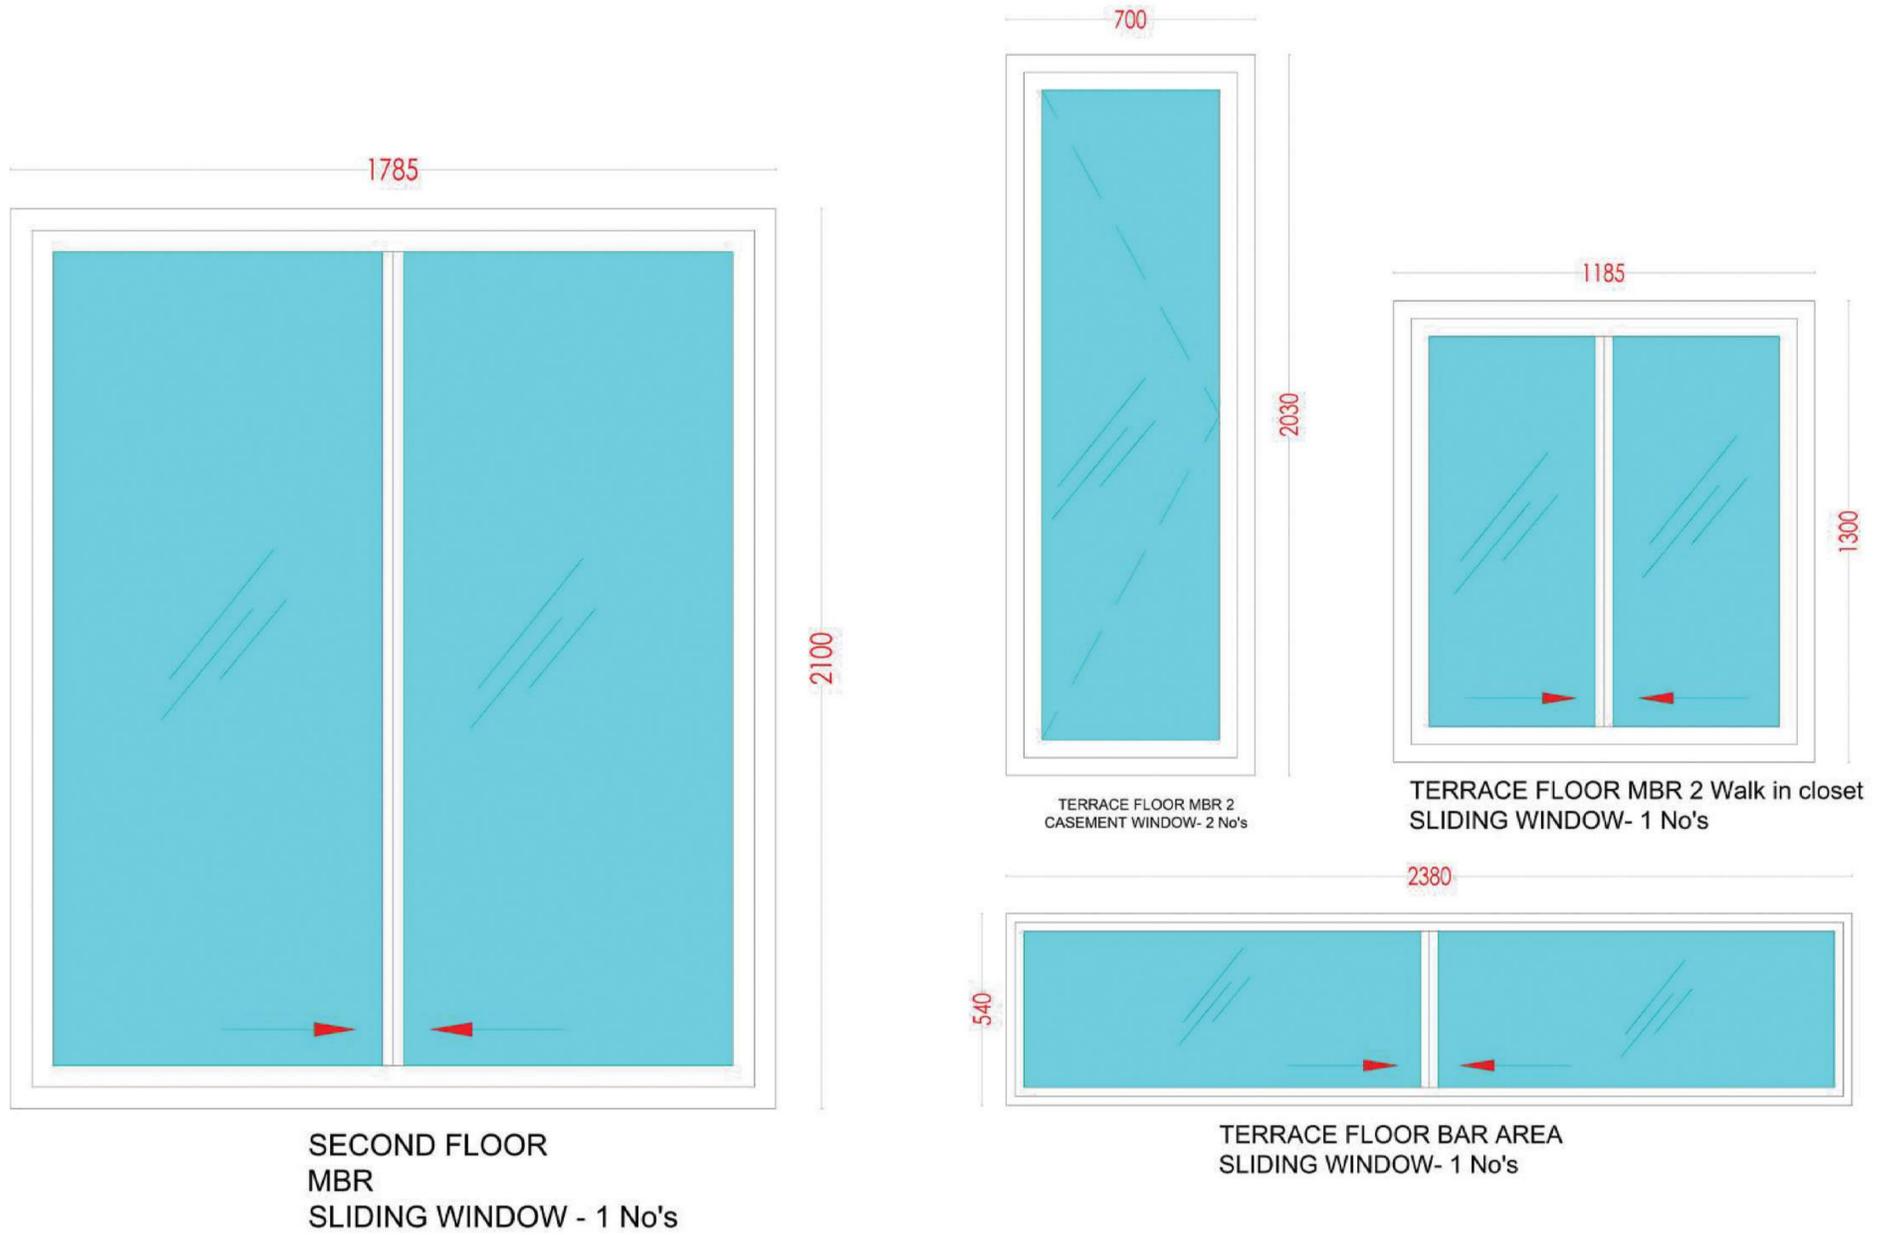

Door presentation will be provided for the main door, pooja door, walk-in closet, bedroom, and bathroom doors.

- Following the selection of design options, detailed drawings will be meticulously prepared.
- No revisions can be accommodated after the release of the detailed drawings.
- The drafting process is anticipated to span 7 working days.

Note: Any modifications to the Doors presentation will result in an additional cost of ₹3,000 per revision. Clients are encouraged to share their ideas and references before finalizing the designs.

UPVC DRAWING

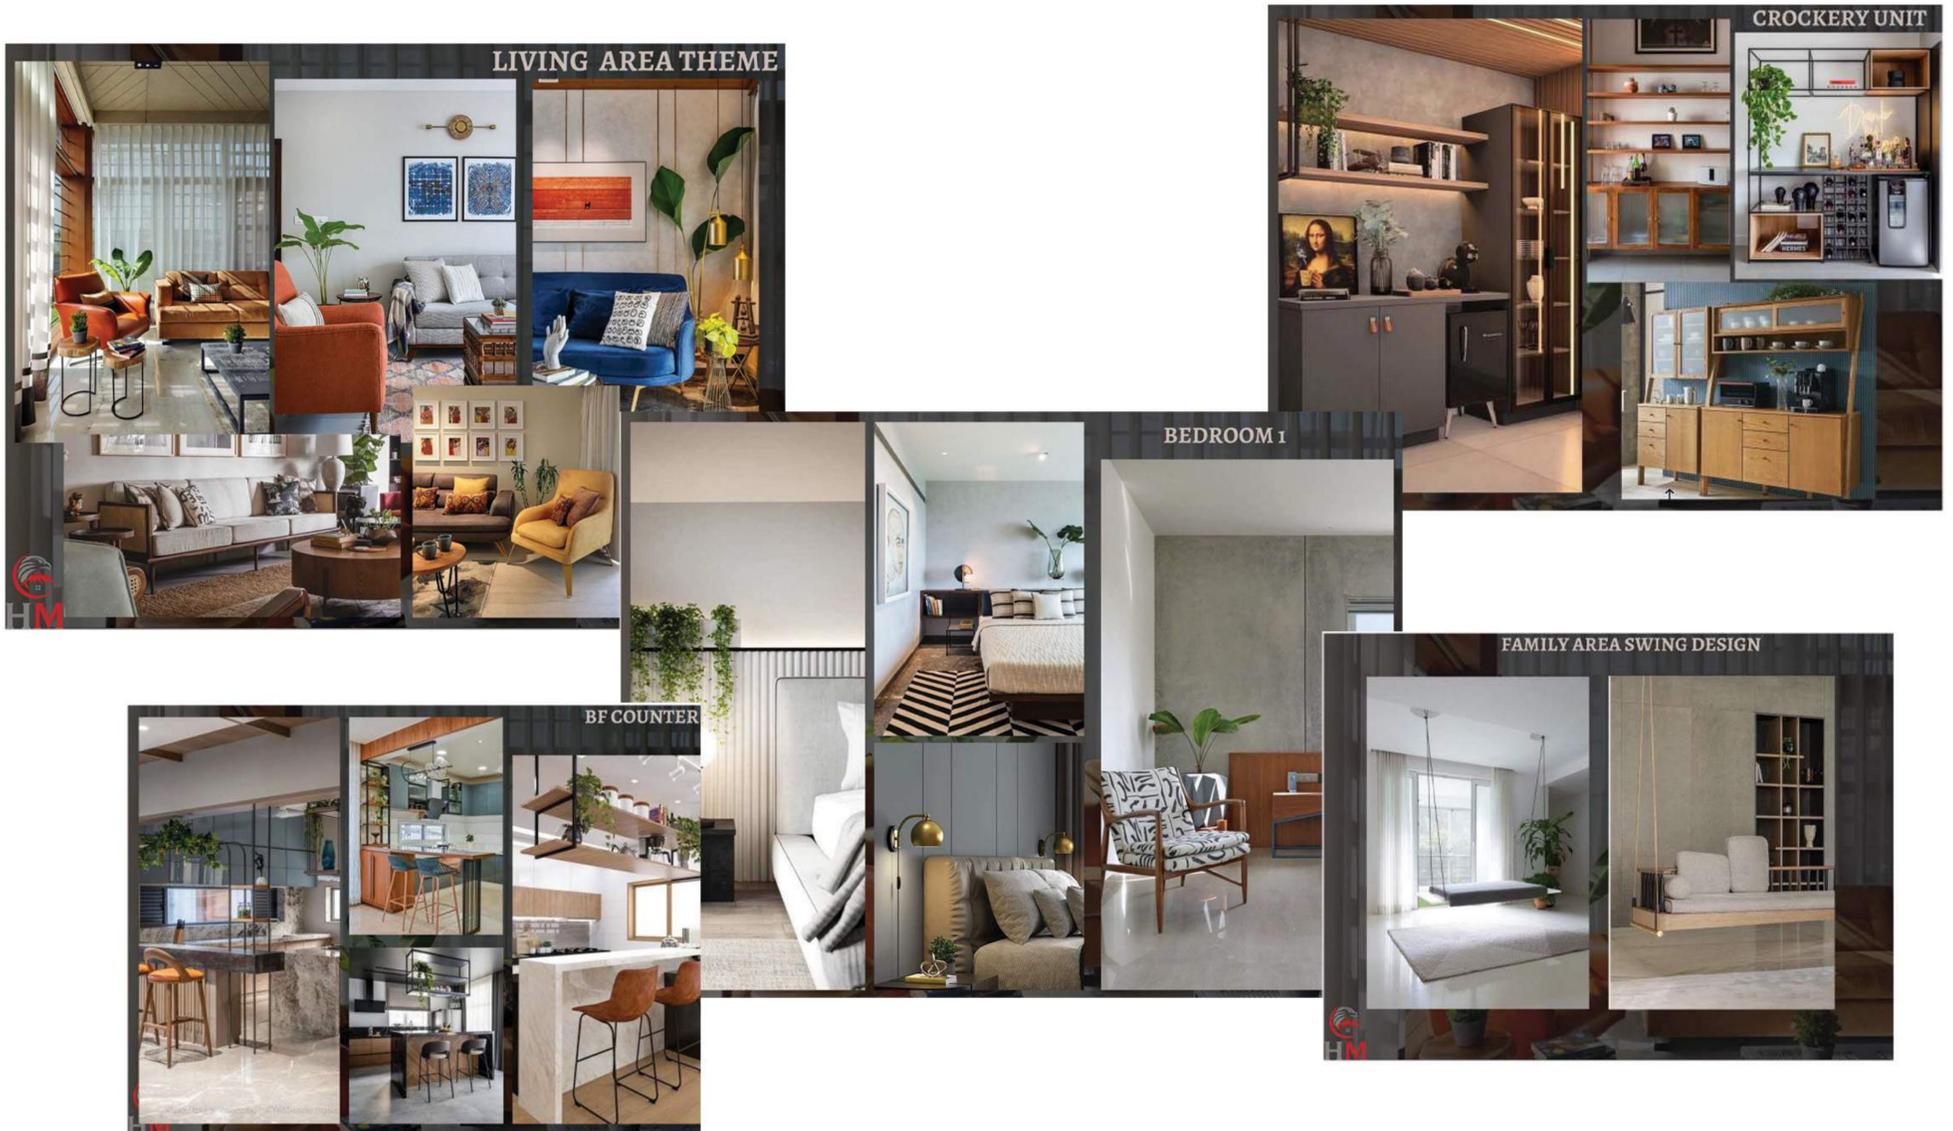

Comprehensive UPVC drawings for all windows will be provided.

- No revisions can be accommodated after the release of the detailed drawings.
- The drafting process is anticipated to span 7 working days.

Note: Any modifications to the UPVC drawing will incur an additional cost of ₹3,000 per revision.

INTERIOR PRESENTATION

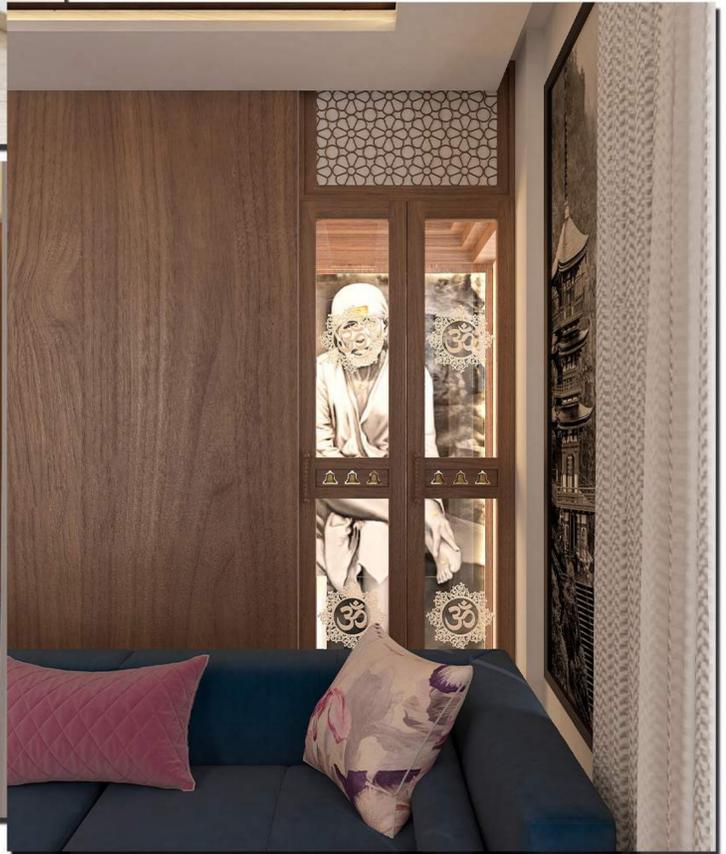

An initial presentation will be crafted to capture the theme preferences for the home, accompanied by a mood board.

- Upon selecting designs from the presentation, detailed 3D and 2D working drawings will be prepared.
- The design presentation allows for one revision; any additional revisions will incur charges of ₹3,000 per presentation.
- The drafting process is anticipated to span 5 working days for initial completion. Subsequent modifications and revisions will then require an additional 3-4 working days to ensure thorough and precise adjustments.

Clients are encouraged to share their references and ideas before finalizing the design.

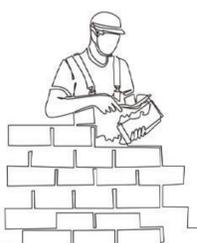

3D INTERIOR VIEWS

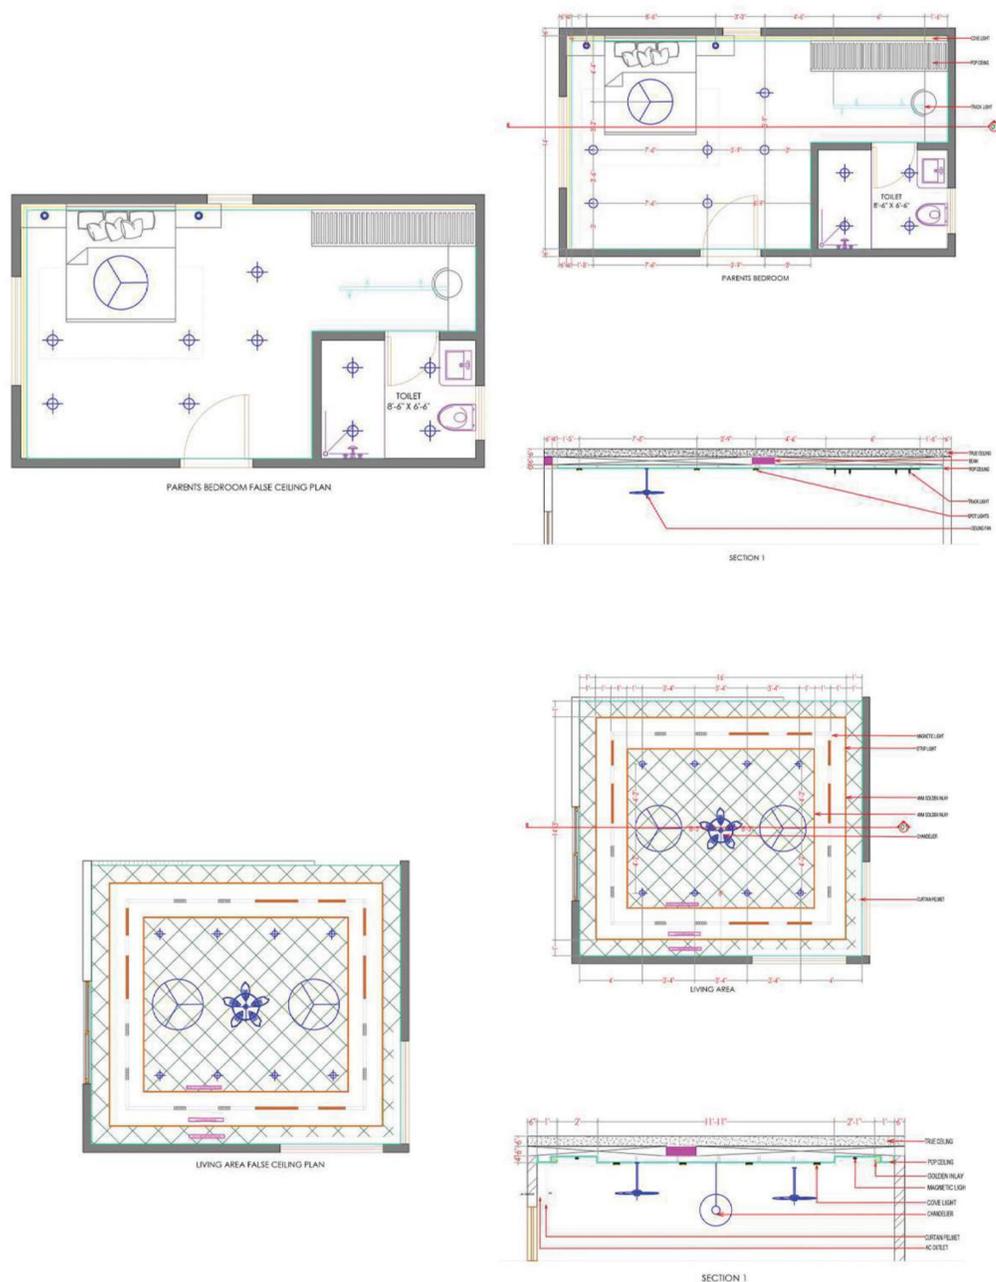

Upon selection of designs from the initial presentation, a detailed 3D view will be provided for each room.

- Each room can feature a maximum of 5 views, encompassing all four walls and the roof.
- The drafting process is anticipated to span 20 working days for initial completion. Subsequent modifications and revisions will then require an additional 10 working days to ensure thorough and precise adjustments. (5 views for each room of all floor)

Up to 2 revisions can be made per room; any additional revisions will incur charges of Rs. 5,000 per render

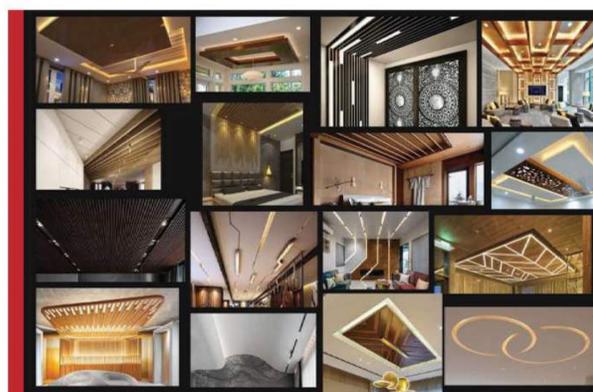

FALSE CEILING DRAWING

MODEST

ORNATE

BASIC

2D false ceiling drawings will be provided upon finalizing the design selection.

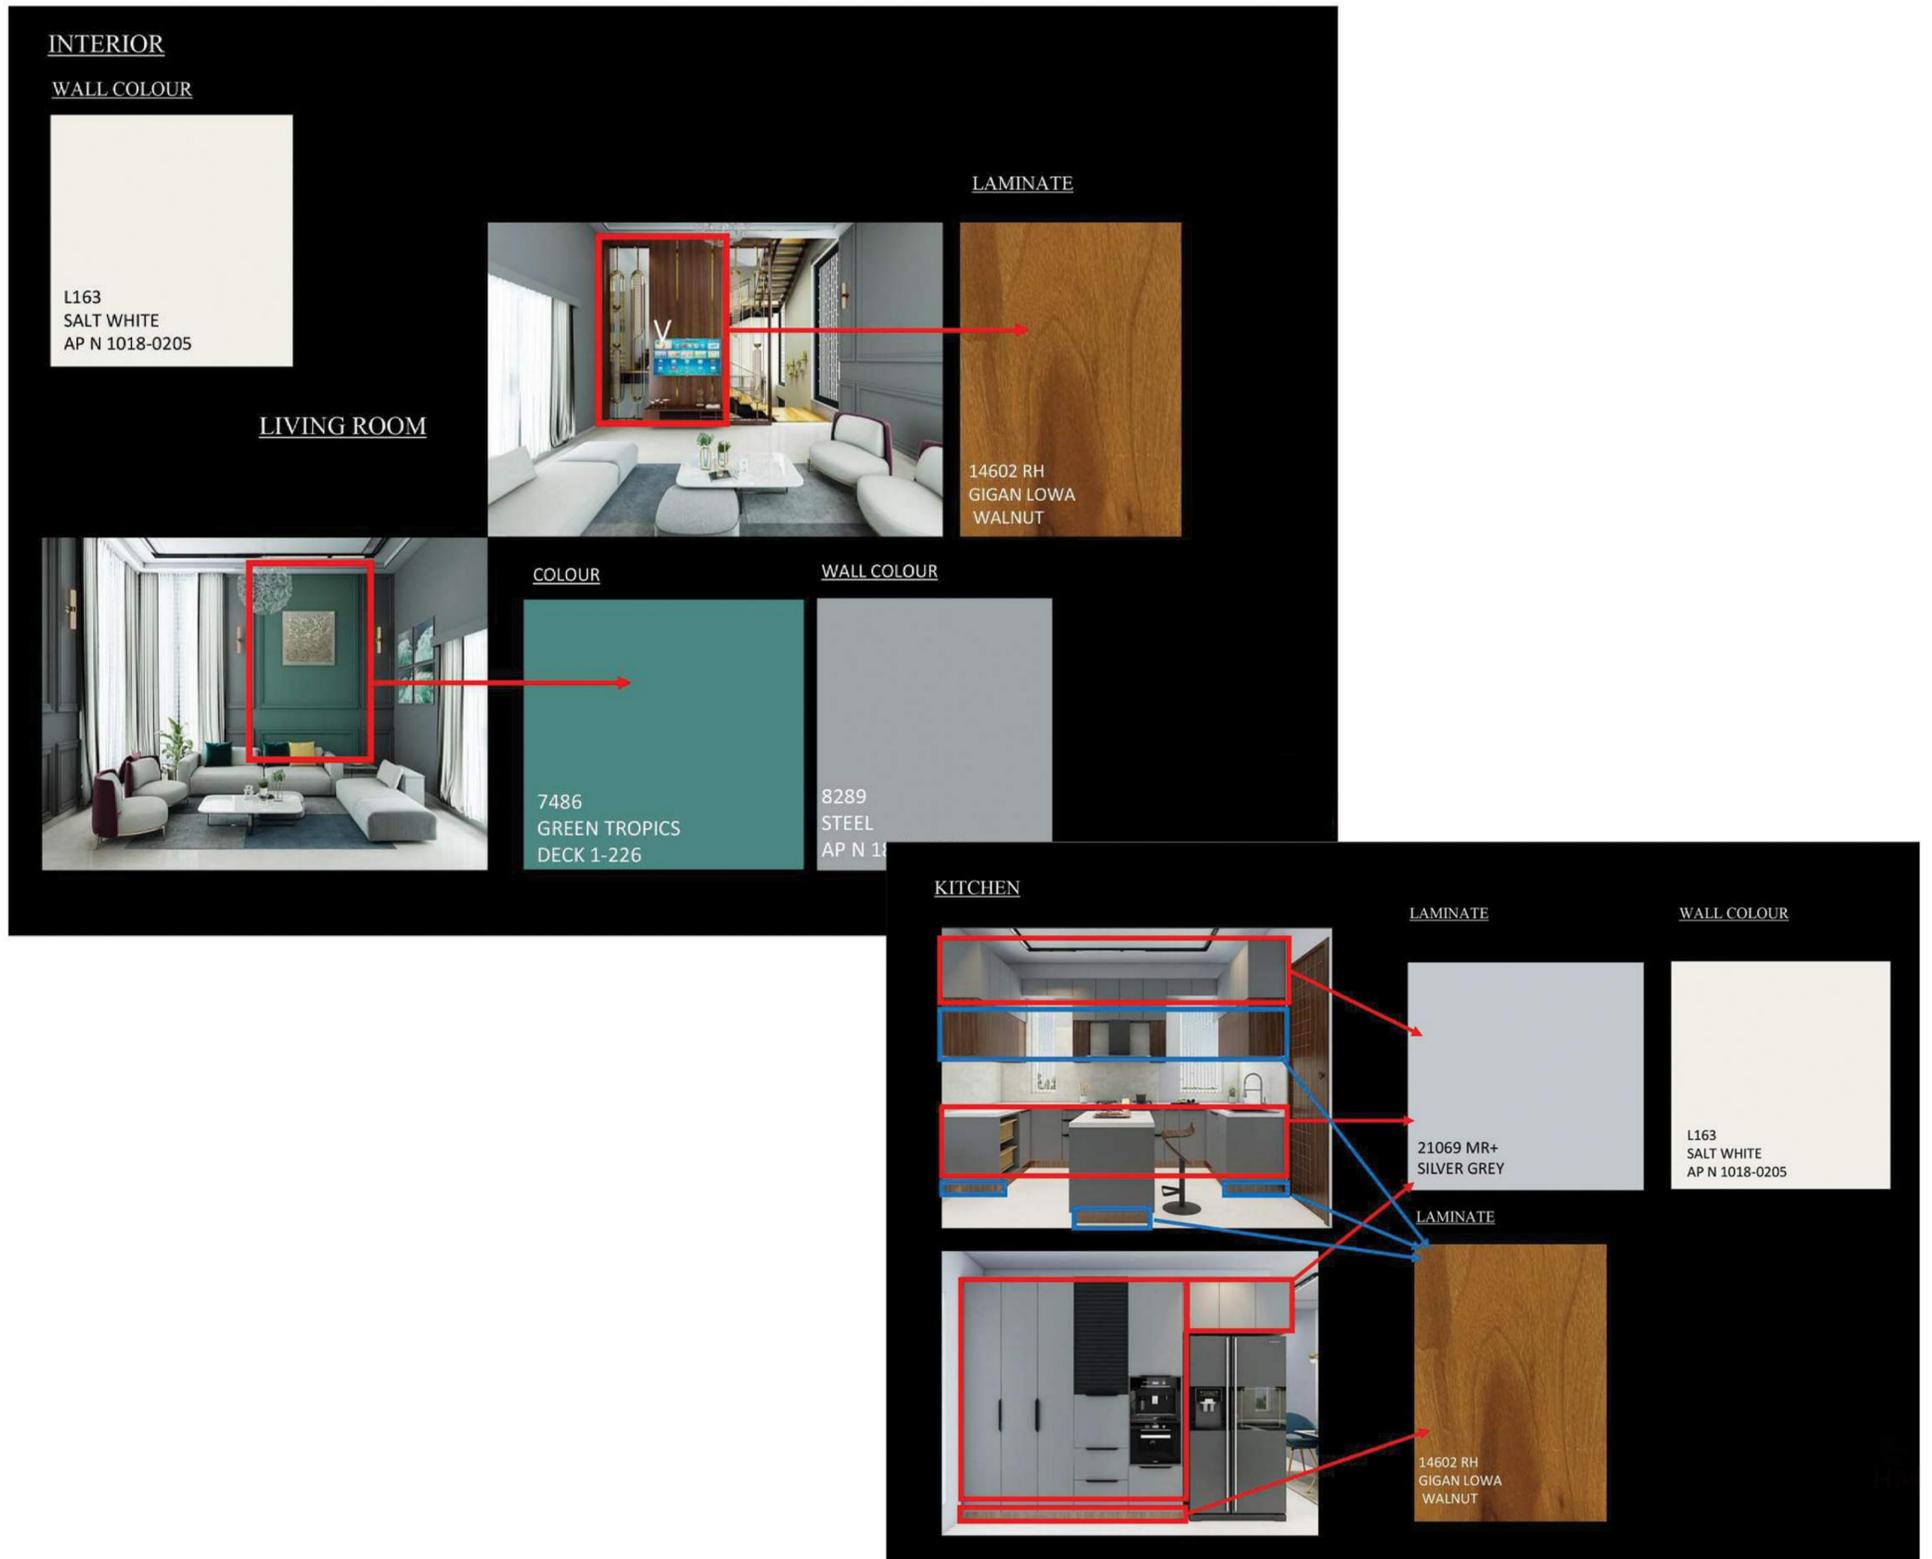

- The 2D drawing process initiates only after the design is confirmed, and no revisions can be made once the drawing is released.
- The drafting process is anticipated to span 3 working days for initial completion. Subsequent modifications and revisions will then require an additional 2 working days to ensure thorough and precise adjustments.

Note: Any modifications to the false ceiling drawing will incur an additional cost of ₹3,000 per revision. Clients are encouraged to share their references and ideas before finalizing the design

EXTERIOR/INTERIOR

PAINT COLOUR CODE

Specific color codes corresponding to each wall will be provided based on the interior color theme.

- No options will be available after the final color codes are released, as they are dependent on the selected 3D interiors.
- The drafting process is anticipated to span 3-4 working days.

Any changes to the color scheme can be accommodated at an additional cost of ₹3,000 per presentation

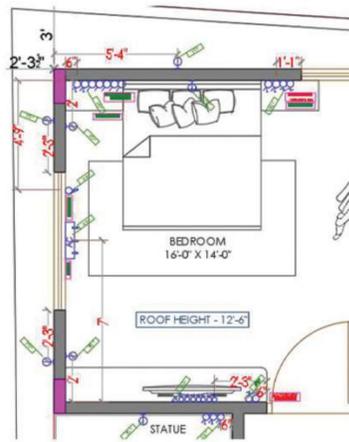

DESIGNER LIGHT SELECTION

HANGING LIGHT - 2 NO.

GUEST BEDROOM

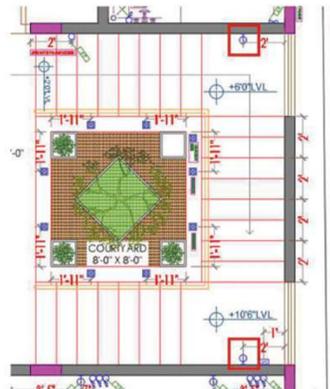

OPTION 1

WALL LIGHT - 6 NO.

STAIRCASE
LIGHT

Designer lighting options will be chosen from the curated catalogue available at our office premises.

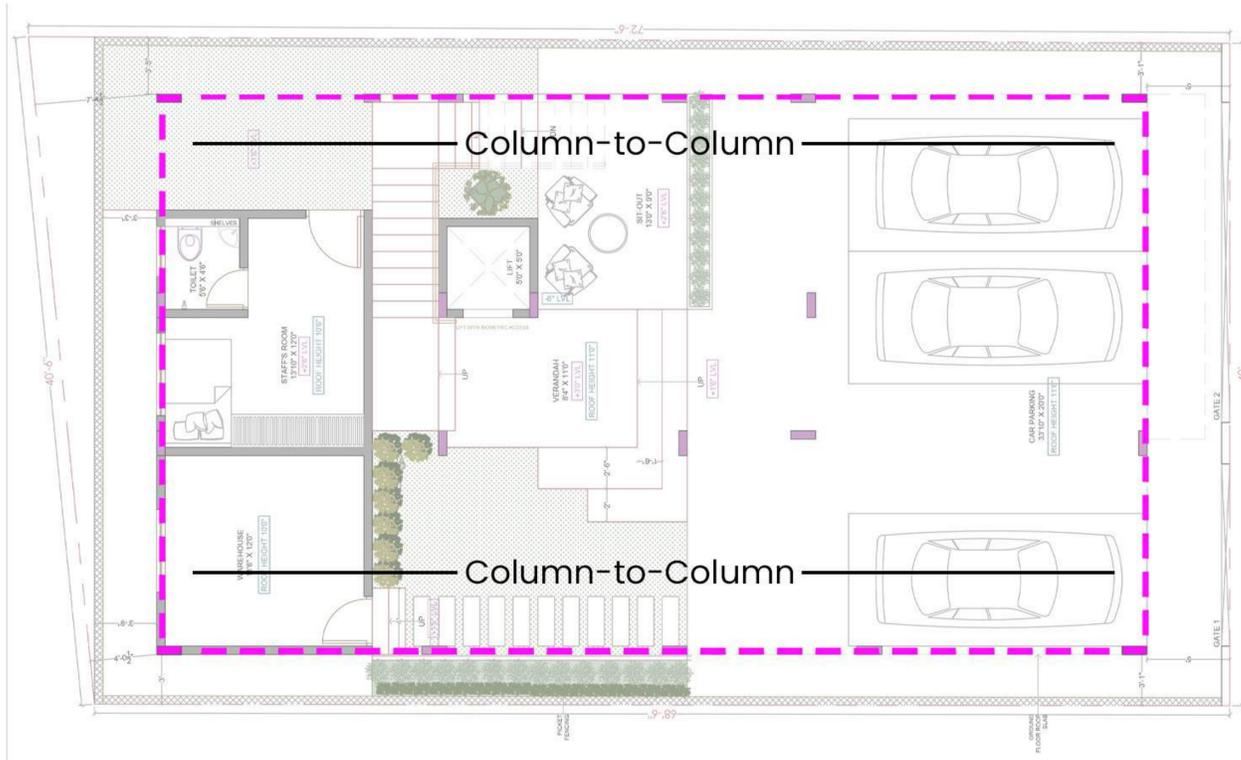

- The selection of lights will be aligned with the overall interior theme.

-The drafting process is anticipated to span 10 working days for Designer lights/curtains/furniture and another 5 workig days if any changes has to be made.

Clients are welcome to make their own selections from the provided catalogue.

BUILT-UP AREA CALCULATION

The "**Built-up area**" or "**Column to column**" system refers to how we calculate charges for the architectural design of your space, specifically focusing on the areas measured between the structural columns. Here's how it works:

Accurate Space Measurement:

We measure the designable area from one structural column to another. This method ensures we cover all usable space without including unnecessary external areas or voids. It gives an exact figure for the space you want to design.

Fair Pricing:

Since our system is based on precise measurements, you're only charged for the exact area within the column-to-column span. This ensures you are billed for the actual usable space, making our pricing fair and transparent.

Material and Design Flexibility:

The total cost of your design will vary based on your material choices and design complexity. Since the "Column to Column" system gives you a clear understanding of the measured area, it helps you estimate costs more easily depending on the kind of finishes and design details you choose.

Transparency in Billing:

Using this method, clients can clearly see how the space is being calculated and charged, allowing for complete transparency. This allows you to plan your budget more effectively and understand exactly what you are paying for.

ARCHITECTURAL PACKAGE

Deliverables for the Advance Payment towards the project						
Sl. No.	Particulars	No. of options	No. of Revisions	No. Of Working days	No. Working days for Revisions	Revision / New option - Charges
1	2D Floor Plan	3	4	7 Working days (each option)	7 Working days	-
2	Soil Test	-	-	-	-	-
3	Structural Drawing	-	-	-	-	-
4	3D Elevation	2	1	15 Working Days	15 Working Days	-
5	BOQ Estimation according to Material Selection	-	-	7 Working days	According to the changes in 2D floor	-
INR 1,00,000/- 18% GST (Full Payment must be made to begin the drafting process.)						
Soil testing will be conducted by Made in Home at no additional cost.						
Estimation can proceed once the floor plan approval is received from the client's end.						
Further drawings will be delivered once the contract for construction and interiors has been signed.						
The advance amount paid towards the architectural package is non-refundable if the client chooses not to proceed with the proposed budget. However, the amount will be adjusted against the architectural package, which is priced at ₹150/sqft + 18% GST.						

Architectural Package Terms:

The architectural package will only apply if the execution of the project, including both construction and interiors, is handed over to Made in Home: Formerly Harishmane Infratech Pvt. Ltd. We do not provide standalone architectural plans without a contract.

Refund Policy:

A refund of the advance payment can only be processed under the following conditions

- If the drafting process for the floor plan has not yet commenced.
- If we fail to meet the agreed timeline for delivering the floor plan options.
- The advance payment is non-refundable if the BOQ estimation exceeds the expected budget.

Timeline for Deliverables:

- Each floor plan option will take **7 working days** for drafting and will be delivered within this timeline.
- The BOQ estimation process will begin after the client has approved the floor plan and will also require **7 working days** to complete.
